2. Version of the Procedure or Methodology used to determine the credit rating as required by Paragraph (a)(1)(ii)(B) of Rule 17g-7:

The rating assigned by HR Ratings to the entity is based in accordance with the following methodologies established by the rating agency:

- Rating Methodology for Banks, May 2009
Rating Methodology for Sovereign Debt, September 2012
General Methodological Criteria, January 2017

3. Main assumptions and principles used in constructing the procedures and methodologies to determine the credit rating as required by Paragraph (a)(1)(ii)(C) of Rule 17g-7:

The objective of the Rating Methodology for Banking Institutions is to evaluate the financial institution's ability and willingness to pay its debt through the relevant parameters that specifically affects these conditions. Also, HR Ratings evaluates the institution's capacity to maintain a certain level of capitalization.

To evaluate all the relevant risks that affect the Banking Institution credit quality, HR Ratings classifies them into qualitative risks and quantitative risks. The division of categories is fundamental to differentiate between the numerically measurable factors and based on the financial model (quantitative risks) of the factors that are sensitive to the management of the institution and which are unrelated to the financial model (qualitative risks).

The qualitative risks category includes risk factors such as: 1) Industry risk, 2) Assessment of management and operational risks and 3) Accounting, regulatory and competitive risks. Given the nature of the category, HR Ratings assigns a rating to each of these risks.

The Financial projections for Banking Institutions represents the structural basis for the quantitative risks category. These projections incorporate historical financial information that the institution delivers to HR Ratings and with which forecasts are prepared minimum for the next 8 quarters.

Definition

The long term global rating assigned to the Senior Notes is HR A- (G) with Negative Outlook. The issuer or issue with this rating offers acceptable safety for timely payment of debt obligations.

\*HR Ratings de México, S.A. de C.V. (HR Ratings), is a Credit Rating Agency registered by the Securities and Exchange Commission (SEC) of the United States as an NRSRO for this type of rating.

For the financial projections, the analyst focuses on the capacity of the institution to maintain a capital adequacy ratio and its ability to generate cash flow, even under a high stress scenario. Both factors are fundamental so that the entity can reliably meet its financing needs. The factors the analyst takes into consideration for the projections and to present a reliable scenario include economic environment, industry growth expectations, competition, business plan, business cycle, business financial situation, concentration risks of the portfolio and funding structure, among others. With the historically financial information and with the projection we calculate the key financial ratios for the quantitative analysis. The financial ratios taken into consideration are the profitability level, the operating efficiency, portfolio quality, market risk, solvency ratios and liquidity risk. The final rating represents the sum of the rating assessment given by the qualitative risks analysis and in the quantitative risk analysis.

Our credit ratings need to be understood as rankings of the relative creditworthiness of different entities or credits. Creditworthiness takes into consideration both the ability and willingness to meet debt obligations in the manner prescribed in the relevant documentation. Default refers to the noncompliance of previously agreed obligations.

As our ratings measure relative creditworthiness they do not necessarily reflect any specific statistical probability of default. In order to make more valid rankings of creditworthiness our different methodologies will apply stress case scenarios to complement our base case analysis.

**13. Assumptions made by HR Ratings in determining announced credit ratings and examples of how assumptions impact the rating as required by Paragraph (a)(1)(ii)(M) of Rule 17q-7**

- The rating for the Company is based on the adequate solvency metrics due to the constant generation of profits, which has strengthened its equity.
- Improvement in the portfolio quality with a non-performing loan ratio of 2.3% at the end of 2Q17 (vs. 2.6% at the end of 2Q16).
- Better profitability levels at 2Q17, obtaining an Average ROE and Average ROA of 12.5% and 2.9% (vs. 6.0% and 1.5% at the end of 1Q16).
- In addition, the total debt of the Company counts with different financial instrument to hedge the volatility in the interest's rate and currency.

HR Ratings de México SA de CV (HR Ratings) ratings and/or opinions are opinions of credit quality and/or regarding the ability of management to administer assets; or opinions regarding the efficacy of activities to meet the nature or purpose of the business on the part of issuers, other entities or sectors, and are based exclusively on the characteristics of the entity, issuer or operation, independent of any activity or business that exists between HR Ratings and the entity or issuer. The ratings and/or opinions assigned are issued on behalf of HR Ratings, not of its management or technical staff, and do not constitute an investment recommendation to buy, sell, or hold any instrument nor to perform any business, investment or other operation. The degree of creditworthiness of an issue or issuer, opinions regarding asset manager quality or ratings related to an entity's performance of its business purpose are subject to change, which can produce a rating upgrade or downgrade, without implying any responsibility for HR Ratings. The ratings issued by HR Ratings are assigned in an ethical manner, in accordance with healthy market practices and in compliance with applicable regulations found on the [www.hrratings.com](http://www.hrratings.com) rating agency webpage. There Code of Conduct, HR Ratings' rating methodologies, rating criteria and current ratings can also be found on the website.

Ratings and/or opinions assigned by HR Ratings are based on an analysis of the creditworthiness of an entity, issue or issuer, and do not necessarily imply a statistical likelihood of default, HR Ratings defines as the inability or unwillingness to satisfy the contractually stipulated payment terms of an obligation, such that creditors and/or bondholders are forced to take action in order to recover their investment or to restructure the debt due to a situation of stress faced by the debtor. Without disregard to the aforementioned point, in order to validate our ratings, our methodologies consider stress scenarios as a complement to the analysis derived from a base case scenario. The rating fee that HR Ratings receives from issuers generally ranges from US\$1,000 to US\$1,000,000 (or the foreign currency equivalent) per issue. In some instances, HR Ratings will rate all or some of the issues of a particular issuer for an annual fee. It is estimated that the annual fees range from US\$5,000 to US\$2,000,00 (or the foreign currency equivalent).
