Non-farm payrolls indicate a decline in July. The participation rate has reached its lowest level since 1976

In July, U.S. nonfarm payrolls unexpectedly decreased by 23,000 jobs, with the unemployment rate at 4.1%, as reported by the BLS. The consensus anticipated an increase of 83,000 positions. The figures indicated that job growth from the previous two months was significantly downgraded, suggesting a much weaker labor market than anticipated. The May data were adjusted to reflect an addition of 63,000 jobs, a decrease from the previously reported 129,000 jobs, whereas the June figures were revised downward by 37,000 to show an increase of 20,000 jobs. The overall number of jobs was adjusted downward by 103,000. The employment report will moderate anticipations for an interest rate increase from the Federal Reserve next month.

*Inflation based on Headline CPI. Data for January is an estimate. Measures the real quarterly wage compared to the same quarter of the previous year and to the immediately preceding quarter annualized. Refers to all employees in the private sector.

The weak employment growth stands in contrast to much stronger GDP growth and implies a significant increase in labor productivity which is not reflected in overall increases in real wages. On an annual basis total payroll in the June quarter increased by a modest 0.23% while real GDP expansion was at a 2.3% rate. On an annualized basis GDP expanded by 1.5% in 2Q vs. 1Q while the comparable figure for payroll growth was 0.6%. At the same time as Figure 1 shows real wages are down.

The most significant declines were found in local government education, which had a reduction of 50,000, followed by retail trade with a loss of 19,000, and financial activities with a decrease of 14,000. The retail industry experienced a decline of 21,000 jobs due to reductions in warehouse clubs, supercenters, and general merchandise establishments. Real wage growth has lagged behind broader inflation, signaling tighter consumer spending behavior and economic caution. Average hourly wages have risen by 3.2% over the course of the year, but only by 0.5% in the last twelve months.

Healthcare employment rose by 22,000, however this figure is significantly lower than the monthly average of 36,000 recorded during the previous year. Employment in construction increased, alongside a 5,000 rise in manufacturing positions. Employment showed minimal fluctuations during the month in various sectors such as mining, oil and gas extraction (-2,000), construction (+22,000), and transportation (+9,700).

The labor force participation rate declined to 61.4%, marking the lowest point in five years. Disregarding the influence of the COVID-19 epidemic, the labor force participation rate has reached its lowest point since 1976 (61.3%), potentially because of the minimal immigration rate. The unemployment rate decreased to 4.1% last month from 4.2% in June, attributed to an additional 264,000 individuals leaving the labor force.

Figure 2. Unemployment and labor force participation rate (monthly)

Fed officials are divided over whether to increase or maintain interest rates. The debate regarding the near-term monetary policy outlook may be intensified by the inflation data that is expected to be released next week. We are of the opinion that the Federal Reserve's decision to maintain the interest rate in its upcoming September meeting will be contingent upon recent employment data and lower than anticipated inflation data for July. Although we still anticipate that the Federal Reserve will raise its benchmark rate by 0.25% by the end of the year that is not likely if the labor market continues to show this degree of weakness. The decline in the unemployment rate appears to be a positive but the reality is different given the decline in the labor participation rate as individuals leave the labor market, or indeed the country.

HR Ratings de México, S.A. de C.V. ("HR Ratings"), is an credit rating agency authorized by the National Banking and Securities Commission(CNBV) and registered by the Securities and Exchange Commission (SEC) as a Nationally Recognized Statistical Rating Organization (NRSRO) for the assets of public finance, corporates and financial institutions as described in section 3 (a) (62) (A) and (B) subsection (i), (iii) and (v) of the US Securities Exchange Act of 1934 and certified as a Credit Rating Agency (CRA) by the European Securities and Markets Authority (ESMA) and the Financial Conduct Authority (FCA).

The ratings and/or opinions of HR Ratings are opinions regarding the credit quality and/or the asset management capacity, or relative to the performance of the tasks aimed at the fulfillment of the corporate purpose, by issuing companies and other entities or sectors, and are based on exclusively in the characteristics of the entity, issue and/or operation, regardless of any business activity between HR Ratings and the entity or issuer. The ratings and/or opinions granted are issued on behalf of HR Ratings and not of its management or technical personnel and do not constitute recommendations to buy, sell or maintain any instrument, or to carry out any type of business, investment or operation, and may be subject to updates at any time, in accordance with the rating methodologies of HR Ratings.

HR Ratings bases its ratings and/or opinions on information obtained from sources that are believed to be accurate and reliable. HR Ratings, however, does not validate, guarantee or certify the accuracy, correctness or completeness of any information and is not responsible for any errors or omissions or for results obtained from the use of such information. Most issuers of debt securities rated by HR Ratings have paid a fee for the credit rating based on the amount and type of debt issued. The degree of creditworthiness of an issue or issuer, opinions regarding asset manager quality or ratings related to an entity's performance of its business purpose are subject to change, which can produce a rating upgrade or downgrade, without implying any responsibility for HR Ratings. The ratings issued by HR Ratings are assigned in an ethical manner, in accordance with healthy market practices and in compliance with applicable regulations found on the www.hrratings.com rating agency webpage. HR Ratings' Code of Conduct, rating methodologies, rating criteria and current ratings can also be found on the website.

Ratings and/or opinions assigned by HR Ratings are based on an analysis of the creditworthiness of an entity, issue or issuer, and do not necessarily imply a statistical likelihood of default, HR Ratings defines as the inability or unwillingness to satisfy the contractually stipulated payment terms of an obligation, such that creditors and/or bondholders are forced to take action in order to recover their investment or to restructure the debt due to a situation of stress faced by the debtor. Without disregard to the aforementioned point, in order to validate our ratings, our methodologies consider stress scenarios as a complement to the analysis derived from a base case scenario. The fees HR Ratings receives from issuers generally range from US\$1,000 to \$1,000,000 (one million dollars, legal tender in the United States of America) (or the equivalent in another currency) per offering. In some cases, HR Ratings will rate all or some of a particular issuer's offerings for an annual fee. Annual fees are estimated to vary between \$5,000 and US\$2,000,000 (five thousand to two million dollars, legal tender in the United States of America) (or the equivalent in another currency).
